

DATASIM REQUEST

Please complete the details and return to **011 650 1936**

Description of service:

The Vodacom Data SIM is ideal for those contract subscribers who own a handset for voice and a data card or a Blackberry for data usage. Usually subscribers would have to remove the SIM card from their handset and place it into the data device each time they desire to use it. Data SIM will enable subscribers to retain a SIM card for the handset (Voice Calls) and have a separate SIM card for their data device (DATA BUNDLE ONLY). This service will have a monthly subscription fee of R9-00 incl. VAT, Connection Fee R97, SIM card Fee R105 all incl.VAT.

Please include the following forms when returning this completed form:

- Copy of ID
- Proof of payment for new Simcard

What is it?

You can add up to **Two** additional Data SIM's to your existing Vodacom contract and use these SIMs in your Vodafone Mobile Connect Card, your BlackBerry, your cellphone dedicated to accessing data or your 3G Router to access data services without removing your contract SIM from your cell phone.

To illustrate – you can now make calls while being connected to the Internet with your Vodafone Mobile Connect Card and receive email on your BlackBerry – all at the same time.

How does it work?

The Data SIMs is linked to your Primary contract account and the usage of all SIMs are linked and billed to this Primary contract account. **Please note** that the Data SIMs you use will not allow you access to voice services, making or receiving calls, from these devices.

You will be able to send SMS messages from these devices. You can also receive SMS messages from friends and family to these devices if you provide the cellphone number of the SIM in the devices.

How much does it cost?

A once off connection fee of **R97.00** as well as a SIM card fee of **R105.00** is applicable on activation and a subscription fee of **R9.00** will be levied per month for each Data SIM. The usage of each Data SIM is charged at the applicable data rate subscribed to and will be billed to your primary contract account.

Terms and Conditions

The Data SIM will only be available to Contract subscribers (excluding Top Up) via their relevant Service Provider.

The Service Provider, at the request of the Contract subscriber, adds the Data SIM service to an existing contract subscription. When the Data SIM service is added, a new SIM (**Secondary SIM**) is activated and linked to the Contract of the existing SIM (Primary or Master SIM).

The Secondary SIM/SIMs can therefore not be an existing Contract SIM (in a business / regulatory sense). Like in the case of a Twincall line.

Only standard Contract packages qualify for Data SIM and will **not be available** on any MyMeg packages, HSDPA or 3G packages.

A maximum of up to two associated Data SIMs will be allowed to be linked to one primary Contract SIM.

One of the Data SIMs can be used for data, and the other Data SIM for Blackberry, i.e. two additional Data SIMs may not both be used for data services.

Only the **Primary SIM** will be provisioned with voice, the Secondary Data SIMs will be provisioned to only allow access to data services.

Any other services added to any of the Data SIMs (such as international roaming to allow data access while you travel) can only be done at the request of the Contract holder, directly to their Service Provider.

DATASIM REQUEST

Please complete the details and return to **011 650 1936**

If a SMS or MMS message is sent to a Secondary Data SIM number, the SMS/MMS message will be sent to the requested MSISDN number and not the Primary SIM (Contract MSISDN number).

If the Primary SIM is provisioned for the **Twincall service**, the existing Twincall rules apply, which states that the Voice Call or SMS/MMS message will be routed to the SIM that is active / switched on.

The current Twincall service will be available to subscribers who wish to continue using the service, or who wish to activate the service for the first time. All existing Twincall business rules will apply. Currently there is no monthly subscription or activation fee for the Twincall service.

Only single-numbering will be allowed on Data SIM.
